Part III DETAILED ACTION

Claims 30-34,45,46,48-50, 73,74 are pending.

It is noticed that SEQ ID No. 3 does not correspond to fragment 86-99 of SEQ ID No. 2; it seems that rather, it is fragment 70-85 of SEQ ID No. 2.

Further, applicant is requested to provide SEQ ID number on Fig. 1.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 30-34,73,74 drawn to peptides comprising consecutive residues of SEQ ID No. 3, classified in class 530, subclass 329.
- II. Claims 45,46,48-50,74 drawn to peptides comprising non-consecutive residues of SEQ ID No. 3, classified in class 530, subclass 329.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I and II are drawn to independent and/or patentably distinct peptides since each would be expected to possess distinctly different structure, and/or physico-chemical properties, and/or capable of separate manufacture and/or use. The products of Group II are drawn to peptides comprising non-consecutive residues of SEQ ID No. 3, whereas products of Group I are drawn to peptides comprising consecutive residues of SEQ ID No. 3. Accordingly, a reference teaching a scrambled sequence of Group II will not teach or suggest a peptide of Group I. The Groups will require non co-extensive literature and sequence searches.

Because these inventions are distinct for the reasons given above and the

applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Application/Control Number: 10/015,540

Art Unit: 1631

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

Election of Species Requirement

Election of species should be required prior to a search on the merits in all applications containing both species claims and generic or Markush claims.(MPEP 808.01(a))

Upon election of any single one of the Groups from above the following election of species is hereby required for the initial search for examination on merits:

The claims of Group are individually or dependently directed to a plurality of disclose patentably distinct species of peptides having various replacements of Lys-91 (as specified in claims 33,34,49,50, which will require a burdensome separate bibliographic, manual and computer search. Accordingly, regardless of which group is elected, Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (i.e., a single compound), even though the requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

To be complete, a response to the election of species requirement should include a proper election along with a listing of all claims readable thereon, including any claims subsequently added. MPEP 809.02(a).

Application/Control Number: 10/015,540

Art Unit: 1631

telephone are unsuccessful, the examiner's supervisor Mr. Michael Woodward, can be reached at (703) 308-4028. The fax telephone number for this group is (703) 305-3014.

Page 4

Any inquiry of a general nature or relating the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0196.
